St. Lawrence County Snowmobile Map

47th Edition

Trail Signs

STOP — Purpose: Used to halt users on a snowmobile trail at road crossings and major trail intersections.

STOP AHEAD — Purpose: A warning sign. Warns snowmobilers of the STOP sign ahead.

CORRIDOR 2 — Purpose: To inform the user that he or she is on a designated CORRIDOR trail (a main trail between two points of prominence, a through trail). These signs will have the word CORRIDOR together with its assigned trail number.

SECONDARY 5B — Purpose: To inform the user that he or she is on a designated SECONDARY trail (a connector trail between two corridor trails or a trail head and a corridor trail). These signs will have the word SECONDARY together with its assigned trail number.

Purpose: Used to reassure the trail user that he or she is on the designated trail. Also used to keep the trail user in the trail corridor and on designated trails in large open areas. It also guides the trail groomers after storms or before the trail base is established.

Purpose: Used to furnish information to the trail user about the trails or facilities, i.e., FOOD, GAS, LODGING.

SNOWMOBILING PERMITTED — Purpose: Used to tell the trail user that a trail or area where snowmobiling is permitted. These signs are placed at trailheads.

YIELD — Purpose: The YIELD sign warns users that a trail intersection is approaching and may have heavier and faster traffic going through. The YIELD sign, rather than the STOP sign, may be used at trail intersections or junctions where speed and visibility allow the safe blending of vehicles without the necessity of a stop.

CAUTION — Purpose: Used to caution the user of a particular hazard or situation on a trail. These signs may be placed 50 to 100 yards prior to the hazard.

NO SNOWMOBILING — Purpose: Used to tell the trail user of an area or trail where no snowmobiling is permitted.

Purpose: Used to caution trail users of a sudden or drastic change in trail direction.
